Cumin seeds

WHOLE SPICES | Whole seeds

Representative photograph; not the offered lot.

Cumin is a whole spice with elongated, ridged seeds and a distinctive savoury aroma. Buyers may use the seeds directly or grind them into seasoning blends. The cleaning level and agreed lot specification are important when comparing offers.

COMMON APPLICATIONS

Spice trading; grinding; curry and seasoning blends; food processing.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Listed options	99% Europe quality; 99% Singapore quality
Purity (%)	Minimum purity and permitted foreign matter
Moisture (%)	Maximum acceptable moisture
Cleaning & grade	Required cleaning level and grade description
Aroma / volatile oil	Aroma expectations and any volatile-oil test requirement
Appearance	Colour, seed uniformity and acceptable damaged-seed limits

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

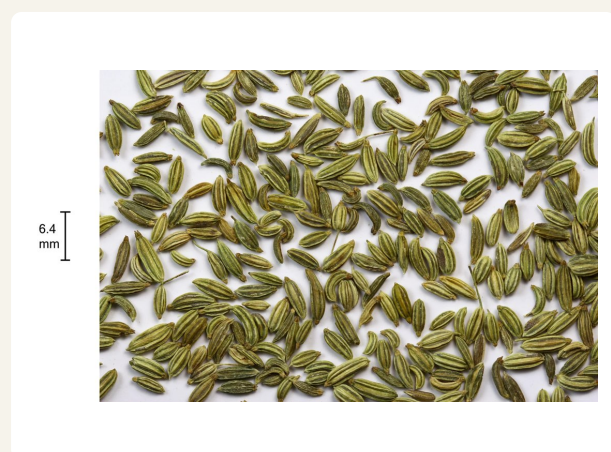

REQUEST A QUOTATION

Full specification guide online

Fennel seeds

WHOLE SPICES | Whole seeds

Representative photograph; not the offered lot.

Fennel is an aromatic whole spice with elongated, ridged seeds. Buyers often compare colour, seed size, cleaning and aroma. These characteristics should be agreed from a specification and, where needed, a representative sample.

COMMON APPLICATIONS

Seasoning blends; food ingredients; spice distribution; grinding.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Listed options	99% Europe quality; 99% Singapore quality
Purity (%)	Minimum purity and permitted foreign matter
Moisture (%)	Maximum acceptable moisture
Seed size	Size or sieve requirement
Colour	Required colour range and sample reference
Aroma / volatile oil	Aroma expectations and any volatile-oil requirement

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

REQUEST A QUOTATION

Alfalfa seeds

SEEDS | Planting seeds

Representative photograph; not the offered lot.

Alfalfa seeds are offered for planting enquiries to establish a fodder crop. Buyers should specify the variety, intended growing region and seed-quality requirements. Planting seed quality must be described using a lot-specific test report and any required certification.

COMMON APPLICATIONS

Fodder crop establishment; agricultural seed distribution.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Listed options	Single-year quality; Multi-year quality
Variety & identity	Required variety and intended growing region
Germination (%)	Minimum target and required test date
Physical purity (%)	Minimum pure seed; limits for inert matter and other seeds
Moisture (%)	Maximum acceptable moisture
Treatment status	Untreated or specified treatment; required declaration
Certification & tests	Required certificate, test report and destination requirements

This listing concerns planting seed. It does not describe seed for human consumption or sprouting. Required variety, certification and export eligibility must be confirmed for the destination.

Fenugreek seeds

WHOLE SPICES | Whole seeds

Representative photograph; not the offered lot.

Fenugreek is a whole spice with small, angular, yellow-brown seeds. It is used whole or ground in spice mixtures and food ingredients. Buyers should specify cleaning, appearance and any processing requirements.

COMMON APPLICATIONS

Spice mixtures; grinding; pickling and food preparation.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Purity (%)	Minimum purity and permitted foreign matter
Moisture (%)	Maximum acceptable moisture
Colour & uniformity	Agreed colour range and seed uniformity
Damaged seeds	Permitted broken, discoloured or damaged seeds

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

REQUEST A QUOTATION

Dill seeds

WHOLE SPICES | Whole & splits - machine clean

Representative photograph; not the offered lot.

Shiva Exim lists machine-cleaned dill seeds in whole and split forms. These aromatic dried seeds are used in pickling, seasoning blends and food processing. Specify the preferred form, purity, moisture, aroma and appearance so the proposed lot can be compared with your specification.

COMMON APPLICATIONS

Pickling; seasoning blends; soups and sauces; food ingredient processing.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Listed options	Whole - machine clean; Splits - machine clean
Product form	Whole or splits - machine clean
Purity (%)	Minimum purity and permitted foreign matter
Moisture (%)	Maximum acceptable moisture
Aroma / volatile oil	Aroma requirement and any oil-content target with test method
Appearance & uniformity	Colour, size reference and acceptable damaged material
Cleaning	Machine clean; specify foreign-matter limits

Whole and split forms are listed as machine clean. Detailed size, purity, moisture, test results and availability are confirmed for the offered lot.

Cumin powder

GROUND SPICES | Ground spice

Representative photograph; not the offered lot.

Cumin powder is ground cumin used when a ready-to-blend spice ingredient is needed. Buyers should specify the required grinding fineness, aroma, ingredient declaration and lot testing rather than relying on the product name alone.

COMMON APPLICATIONS

Seasoning blends; packaged foods; food service; ingredient manufacturing.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Fineness / mesh	Grinding or sieve requirement
Moisture (%)	Maximum acceptable moisture
Aroma / volatile oil	Required aroma profile and any test target
Ingredient declaration	Required composition and declarations
Colour	Agreed sample or colour reference

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

[REQUEST A QUOTATION](#)

[Full specification guide online](#)

Coriander powder

GROUND SPICES | Ground spice

Coriander powder is ground coriander seed, used as an ingredient in spice blends and prepared foods. Grinding fineness, colour, aroma and agreed testing help buyers compare products intended for different applications.

COMMON APPLICATIONS

Seasoning blends; sauces; prepared foods; food service.

Representative photograph; not the offered lot.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Fineness / mesh	Grinding or sieve requirement
Moisture (%)	Maximum acceptable moisture
Aroma	Required aroma profile or sample reference
Colour	Agreed colour or sample reference
Ingredient declaration	Required composition and declarations

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

Whole chilli

WHOLE SPICES | Dried whole chilli

Representative photograph; not the offered lot.

Whole chilli is dried chilli in unground form. Commercial requirements can differ by variety, colour, heat and stem preference. Buyers should specify these separately because colour strength and pungency are different characteristics.

COMMON APPLICATIONS

Grinding; spice trading; seasoning and food processing.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Variety & stems	Required variety; with or without stems
Heat / pungency	Required heat range and test method, if applicable
Colour strength	Colour target or sample; test requirement if needed
Moisture (%)	Maximum acceptable moisture
Defects & foreign matter	Limits for damaged pods, unwanted matter and other defects

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

REQUEST A QUOTATION

Full specification guide online

Chilli powder

GROUND SPICES | Ground spice

Representative photograph; not the offered lot.

Chilli powder is dried chilli ground for seasoning and food processing. Buyers should agree the desired heat, colour and particle size. A red appearance alone does not define the pungency or the agreed product composition.

COMMON APPLICATIONS

Seasonings; sauces; snack coatings; food manufacturing.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Heat / pungency	Required heat range and test method
Colour strength	Required colour value or agreed sample
Fineness / mesh	Grinding or sieve requirement
Moisture (%)	Maximum acceptable moisture
Ingredient declaration	Required composition and declarations

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

REQUEST A QUOTATION

Full specification guide online

Turmeric

WHOLE SPICES | Whole dried turmeric

Representative photograph; not the offered lot.

Whole turmeric is dried turmeric rhizome supplied for trading or grinding. Buyers should specify the desired form and variety, appearance and any curcumin test requirement. The offered lot specification should define the agreed quality.

COMMON APPLICATIONS

Grinding into powder; spice trading; food ingredient processing.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Form	Required fingers, bulbs or other agreed form
Curcumin (%)	Minimum target and test method if required
Moisture (%)	Maximum acceptable moisture
Colour & appearance	Agreed colour and condition
Foreign matter & defects	Permitted limits for unwanted or damaged material

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

[REQUEST A QUOTATION](#)

[Full specification guide online](#)

Turmeric powder

GROUND SPICES | Ground spice

Representative photograph; not the offered lot.

Turmeric powder is ground dried turmeric. Buyers commonly compare curcumin, colour and grinding fineness alongside moisture and required testing. Final specifications should be agreed for the intended food application.

COMMON APPLICATIONS

Spice blends; prepared foods; sauces; food service.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Curcumin (%)	Minimum target and test method
Fineness / mesh	Grinding or sieve requirement
Moisture (%)	Maximum acceptable moisture
Colour	Agreed colour or sample reference
Ingredient declaration	Required composition and declarations

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

[Full specification guide online](#)

Dry ginger

WHOLE SPICES | Dried ginger

Dry ginger is ginger that has been dried for spice trading and processing. Buyers should specify whole-piece requirements, peeled or unpeeled preference, appearance and any chemistry or aroma targets.

COMMON APPLICATIONS

Grinding; spice blends; food ingredient processing.

Representative photograph; not the offered lot.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Form & processing	Whole-piece size; peeled or unpeeled preference
Moisture (%)	Maximum acceptable moisture
Aroma / volatile oil	Aroma expectations and testing requirement
Appearance & defects	Colour and acceptable damaged-piece limits

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

Onion seeds

SEEDS | Planting seeds

Representative photograph; not the offered lot.

Onion seeds are planting seeds for onion crop production. Buyers should specify the variety and required bulb characteristics, together with seed testing and treatment requirements. This is an agricultural planting product, separate from culinary spices.

COMMON APPLICATIONS

Onion crop production; agricultural seed supply.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Variety & crop preference	Required variety and growing-region requirements
Bulb characteristics	Desired colour, shape and market use
Germination (%)	Minimum target and required test date
Physical purity (%)	Minimum pure seed; limits for inert matter and other seeds
Treatment & certification	Required treatment status, lot reports and certification

For planting use. Confirm variety, growing conditions, treatment and destination seed documentation before ordering.

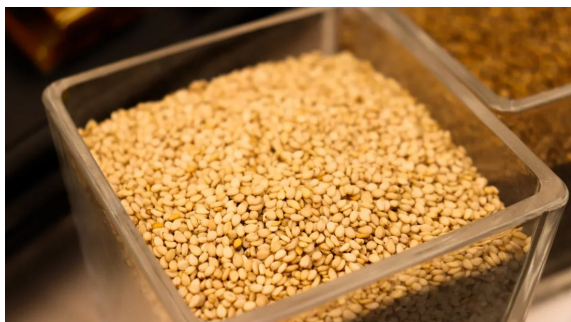

REQUEST A QUOTATION

Full specification guide online

Sesame seeds

SEEDS | Seeds

Representative photograph; not the offered lot.

Sesame seeds are used as food ingredients and for further processing. Natural and hulled sesame have different processing requirements, so buyers should confirm the desired form, colour, cleanliness and intended use.

COMMON APPLICATIONS

Bakery; tahini and sesame pastes; oil processing; ingredient trading.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Form	Natural or hulled requirement
Colour & variety	Required colour and variety preference
Purity (%)	Minimum purity and permitted foreign matter
Moisture (%)	Maximum acceptable moisture
Oil content	Minimum target and test requirement if relevant

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

[REQUEST A QUOTATION](#)

[Full specification guide online](#)

Mustard seeds

SEEDS | Bold & micro seeds

Representative black mustard photograph; type and size are confirmed with the quotation.

Shiva Exim lists bold and micro mustard seeds for human consumption and oil extraction. Bold and micro are commercial type or size descriptions; the required grading or sample reference should be agreed before comparing offers. Tell us the intended application so the offered lot can be assessed against the appropriate quality requirements.

COMMON APPLICATIONS

Human consumption: seasoning, pickling and condiment processing; oil extraction.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Listed type	Bold or micro
Size / grading	Required sieve, size range or sample reference
Intended use	Human consumption or oil extraction
Purity (%)	Minimum purity and permitted foreign matter
Moisture (%)	Maximum acceptable moisture
Seed condition	Permitted broken, damaged and discoloured seeds
Oil content	Target and test method, if relevant to oil extraction
Foreign seeds & admixture	Permitted other seeds and unwanted material

Bold and micro are the confirmed listed options. Seed colour, botanical identity where needed, test results, packing and availability are confirmed for the specific offer.

Wheat

GRAINS & MILLETS | Whole grain

Representative photograph; not the offered lot.

Wheat is a cereal grain used in milling and food processing. Buyers should identify the intended application and required grain quality. Protein, moisture and physical grain condition can be relevant when comparing lots.

COMMON APPLICATIONS

Flour milling; food processing; grain trading.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Variety & intended use	Required wheat type and processing application
Protein (%)	Target and reporting basis, if required
Moisture (%)	Maximum acceptable moisture
Test weight	Required value and unit, if applicable
Foreign matter & damage	Permitted unwanted material and damaged-grain limits

Availability for export is subject to confirmation of current eligibility and destination requirements.

REQUEST A QUOTATION

Full specification guide online

Maize

GRAINS & MILLETS | Cattle-feed grain

Representative maize photograph; not the offered feed-grain lot.
Feed quality and variety are confirmed with the quotation.

Shiva Exim lists dried maize grain for cattle feed. Buyers should provide the feed-grain specification, including moisture, broken kernels, foreign matter, damaged kernels and required contaminant testing. The proposed lot and quality reports must be assessed for the intended cattle-feed application.

COMMON APPLICATIONS

Cattle feed; cattle-feed milling and compound-feed processing.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Intended use	Cattle feed
Grain type & appearance	Required colour or type and sample reference
Moisture (%)	Maximum acceptable moisture
Broken kernels & foreign matter	Maximum acceptable broken grain and foreign-material limits
Damaged kernels	Required limits for damaged, heat-damaged or discoloured kernels
Test weight	Target value, unit and method if required
Feed-quality analysis	Any required protein, fibre or other feed-related analysis
Mycotoxins & testing	Required aflatoxin, other mycotoxin and relevant contaminant tests
GMO-status declaration	Required status and supporting evidence, if applicable

This is a cattle-feed grain enquiry, not an offer of human-consumption maize, popcorn, fresh sweet corn or planting seed. Export eligibility, feed-quality requirements and lot evidence are confirmed before an order.

[Full specification guide online](#)

Foxtail millet

GRAINS & MILLETS | Millet grain

Representative photograph; not the offered lot.

Foxtail millet is a small-grain millet used in grain trading and food processing. Buyers should specify whether they need whole grain or a processed form, together with cleaning and intended-use requirements.

COMMON APPLICATIONS

Grain trading; milling; food ingredients.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Processing form	Whole, dehulled or other requested form
Purity (%)	Minimum purity and permitted foreign matter
Moisture (%)	Maximum acceptable moisture
Broken grains	Maximum acceptable proportion
Crop year & origin	Required harvest year and country or region of origin

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

REQUEST A QUOTATION

Full specification guide online

Green millet

GRAINS & MILLETS | Millet grain

Representative pearl millet photograph; confirm the exact crop and variety when enquiring about green millet.

Green millet is listed under the commercial name provided for the export portfolio. Buyers should confirm the exact crop and variety before comparing specifications or requesting a quotation.

COMMON APPLICATIONS

Agricultural grain trading; application to be confirmed with the crop identity.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Crop & variety	Exact grain identity and local or botanical name
Intended use	Food, feed or another stated application
Purity (%)	Minimum purity and permitted foreign matter
Moisture (%)	Maximum acceptable moisture
Crop year & origin	Required harvest year and country or region of origin

The exact crop represented by “green millet” must be confirmed. It is not automatically described here as pearl millet or another species.

Castor seeds

INDUSTRIAL OILSEEDS | Industrial oilseed

Representative photograph; not the offered lot.

Castor seeds (*Ricinus communis*) are an industrial oilseed. Enquiries should state the intended industrial application, extraction requirements and handling arrangements. This listing is separate from edible oilseeds.

COMMON APPLICATIONS

Industrial castor-oil extraction.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Purity (%)	Minimum purity and permitted foreign matter
Moisture (%)	Maximum acceptable moisture
Oil content	Target percentage and agreed test method
Seed condition	Limits for broken, damaged and immature seeds
Handling & use	Industrial end use and suitable handling arrangements

For industrial use only. Castor seeds are toxic; they must not be eaten or used as animal feed. Confirm handling, packing and destination requirements before ordering.
