Olive oil

OILS | Oil

Representative photograph; not the offered lot.

Olive oil sourcing enquiries should identify the exact commercial category, intended application and packing. Extra virgin, virgin and refined categories should not be treated as interchangeable. Supplier offers should include the declared category and relevant quality information.

COMMON APPLICATIONS

Food ingredients; food service; retail or bulk distribution, as specified.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Oil category	Extra virgin, virgin, refined or other clearly declared category
Quality analysis	Required acidity, peroxide and other applicable analysis
Packing format	Bulk or retail; container type and net volume
Origin & traceability	Country of origin and lot information
Dates & labelling	Production / best-before details and labelling requirements

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

Popcorn

GRAINS & PULSES | Butterfly kernels - 30 kg bags

Representative photograph; not the offered lot.

Popcorn is sourced as unpopped kernels for processing and distribution. Kernel type, commercial size designation and popping performance should be specified together. Supplier offers should include origin, crop year and a sample or performance information.

COMMON APPLICATIONS

Popcorn processing; snack production; food distribution.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Kernel type	Butterfly-type sourcing enquiries
Commercial size	38/40, 40/42 or 42/44; confirm the designation and measurement basis
Popping performance	Expansion requirement, test method and unpopped-kernel limit
Moisture (%)	Maximum acceptable moisture
Requested packing	30 kg bags, with final bag construction agreed
Sourcing origins	Brazil, Argentina or South Africa; confirm origin with the offer

Requested sourcing options: butterfly type; sizes 38/40, 40/42 and 42/44; origins Brazil, Argentina and South Africa; 30 kg bags. Confirm the size/count basis, expansion test, availability and lot results with the quotation.

Sunflower seeds

SEEDS | Seeds

Representative photograph; not the offered lot.

Sunflower seed sourcing can concern whole seeds in shell or peeled kernels. Buyers and suppliers should distinguish food use from oil-processing or planting use and agree the product form before comparing offers.

COMMON APPLICATIONS

Food ingredients; snack processing; other uses only as specified.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Product form	Whole / in-shell or peeled kernels
Intended use	Food or other explicitly stated application
Size & uniformity	Required size range or grading method
Purity (%)	Minimum purity and permitted foreign matter
Moisture (%)	Maximum acceptable moisture
Defects	Limits for damaged seeds, broken kernels and shell material

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

Soybean

GRAINS & PULSES | Whole beans

Soybean is sourced as whole beans for the specified trading or processing requirement. Supplier offers should identify origin, crop year and physical quality, alongside the buyer's intended use and any GMO-status requirement.

COMMON APPLICATIONS

Agricultural processing and trading; intended application to be specified.

Representative soybean varieties; offered variety and colour are confirmed with the quotation.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Intended use	Food, oil processing, feed or another declared use
GMO status	Required status and supporting documentation
Protein / oil	Targets and reporting basis, if relevant
Moisture (%)	Maximum acceptable moisture
Foreign material & damage	Limits for foreign material, splits and damaged beans
Crop year & origin	Required harvest year and country or region of origin

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

[SEND YOUR SUPPLIER OFFER](#)

[Full specification guide online](#)

Pumpkin seeds

SEEDS | Seeds

Pumpkin seed sourcing should specify whole seeds or hulled kernels, together with size, appearance and intended use. The product form and grading method should be clear in each supplier offer.

COMMON APPLICATIONS

Food ingredients; snack production; bakery applications.

Representative photograph; not the offered lot.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Product form	In-shell seeds or hulled kernels
Size / count	Required commercial size and measurement basis
Colour & appearance	Agreed colour and sample reference
Moisture (%)	Maximum acceptable moisture
Defects & purity	Limits for broken kernels, shell pieces and unwanted material

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

[Full specification guide online](#)

Chia seeds

SEEDS | Seeds

Representative photograph; not the offered lot.

Chia seeds are small seeds used in food ingredients and blends. Supplier enquiries should identify colour preference, origin, purity and any required testing, with a clear lot specification.

COMMON APPLICATIONS

Bakery; cereals; food blends and ingredient trading.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Colour preference	Black, white or other declared mix
Purity (%)	Minimum purity and permitted foreign matter
Moisture (%)	Maximum acceptable moisture
Foreign seeds & defects	Limits for other seeds and damaged material
Crop year & origin	Required harvest year and country or region of origin

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

Green peas

GRAINS & PULSES | Dried peas

Representative photograph; not the offered lot.

Green peas in this portfolio refer to dried peas rather than fresh or frozen vegetables. Supplier offers should identify whole or split form, crop year, appearance and physical quality.

COMMON APPLICATIONS

Pulse trading; food processing; milling and split-pea processing.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Product form	Whole or split dried peas
Size & colour	Size requirement and colour reference
Moisture (%)	Maximum acceptable moisture
Defects	Limits for damaged, discoloured or unwanted material
Crop year & origin	Required harvest year and country or region of origin

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

[SEND YOUR SUPPLIER OFFER](#)

[Full specification guide online](#)

Yellow peas

GRAINS & PULSES | Dried peas

Representative photograph; not the offered lot.

Yellow peas in this portfolio refer to dried peas for pulse trading and processing. Whole and split forms have different uses, so the required form, crop year and physical quality should be stated in the offer.

COMMON APPLICATIONS

Pulse trading; food processing; milling and split-pea processing.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Product form	Whole or split dried peas
Size & colour	Size requirement and colour reference
Moisture (%)	Maximum acceptable moisture
Defects	Limits for damaged, discoloured or unwanted material
Crop year & origin	Required harvest year and country or region of origin

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

[SEND YOUR SUPPLIER OFFER](#)

[Full specification guide online](#)

Whole lentils

GRAINS & PULSES | Whole pulses

Representative photograph; not the offered lot.

Whole lentils retain the whole pulse form. Offers should identify the lentil type, colour and size as well as origin and crop year. Different lentil types should be compared against their own agreed specification.

COMMON APPLICATIONS

Pulse distribution; food processing; further splitting or milling.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Type & colour	Required lentil type and colour
Size	Required size or grading method
Moisture (%)	Maximum acceptable moisture
Defects & foreign matter	Permitted damage, discolouration and unwanted material
Crop year & origin	Required harvest year and country or region of origin

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

[SEND YOUR SUPPLIER OFFER](#)

[Full specification guide online](#)

Split lentils

GRAINS & PULSES | Split pulses

Representative photograph; not the offered lot.

Split lentils are lentils processed into split form. Supplier offers should clearly state lentil type, whether the product is dehulled, and any polishing preference. Split size and physical condition should be agreed for the intended use.

COMMON APPLICATIONS

Food processing; pulse distribution; food service.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Type & processing	Lentil type; hulled or dehulled; polishing preference
Split uniformity	Required size and permitted broken material
Moisture (%)	Maximum acceptable moisture
Foreign matter & defects	Permitted unwanted material and damaged splits
Crop year & origin	Required harvest year and country or region of origin

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

SEND YOUR SUPPLIER OFFER

Full specification guide online

Black gram

GRAINS & PULSES | Pulses

Representative photograph; not the offered lot.

Black gram is a pulse used whole or processed into split and dehulled forms. Supplier enquiries should distinguish whole black gram from the requested processed form and state origin, crop year and grade.

COMMON APPLICATIONS

Pulse trading; milling; food processing.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Product form	Whole, split with skin, or dehulled preference
Size & uniformity	Required size and grading method
Moisture (%)	Maximum acceptable moisture
Defects & foreign matter	Limits for damage, unwanted material and processing defects
Crop year & origin	Required harvest year and country or region of origin

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

[SEND YOUR SUPPLIER OFFER](#)

[Full specification guide online](#)

Chickpeas

GRAINS & PULSES | Whole pulses

Representative photograph; not the offered lot.

Chickpeas are traded in different types, including kabuli and desi. The type and size designation should be explicit in supplier offers. Crop year, moisture and physical condition help buyers compare lots for their intended application.

COMMON APPLICATIONS

Pulse trading; food processing; milling; food service.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Type	Kabuli or desi requirement
Size / count	Commercial size or count designation and measurement basis
Moisture (%)	Maximum acceptable moisture
Defects & foreign matter	Limits for damaged, discoloured and unwanted material
Crop year & origin	Required harvest year and country or region of origin

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

Canary seeds

SEEDS | Whole seeds

Representative photograph; not the offered lot.

Canary seeds (*Phalaris canariensis*) are listed for bird-feed ingredient sourcing. Specify the origin, crop year and physical quality required for the intended bird-feed application.

COMMON APPLICATIONS

Bird-feed ingredients; agricultural trading.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Purity (%)	Minimum purity and permitted foreign matter
Moisture (%)	Maximum acceptable moisture
Seed condition	Permitted damaged seeds and discolouration
Other seeds & contaminants	Required limits and testing for unwanted material

This listing is for bird-feed sourcing. It is not a human-food or planting-seed offer.

[SEND YOUR SUPPLIER OFFER](#)

[Full specification guide online](#)

Watermelon seeds

SEEDS | Whole or hulled seeds

Watermelon seeds are listed for human-consumption sourcing. Agree whether the requirement is in-shell seed or hulled kernels, and whether the lot is raw or processed.

COMMON APPLICATIONS

Food ingredients; snack processing; food distribution.

Representative hulled watermelon seed photograph; form and processing status are agreed with the quotation.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Form & processing	In-shell or hulled; raw or agreed processed form
Size & appearance	Size or count, colour and sample reference
Purity (%)	Minimum purity and permitted foreign matter
Moisture (%)	Maximum acceptable moisture
Food-quality testing	Required microbiological and contaminant tests

For human-consumption enquiries, not planting. The photograph is illustrative; offered form and processing status are agreed separately.

SEND YOUR SUPPLIER OFFER

Full specification guide online

Oats

GRAINS & PULSES | Whole oats or groats

Representative photograph; not the offered lot.

Oats are sourced as whole grain or groats according to the intended application. Specify whether the requirement is for food processing or feed, because the form, cleaning and analysis requirements differ.

COMMON APPLICATIONS

Food processing or feed, as specified in the enquiry.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Form & end use	Whole oats or groats; food or feed
Moisture (%)	Maximum acceptable moisture
Test weight	Target value, units and measurement method
Foreign matter & defects	Limits for admixture and damaged grain
Processing & tests	Hulling or other processing; required analysis

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

SEND YOUR SUPPLIER OFFER

Full specification guide online

Berseem seeds

SEEDS | Fodder planting seeds

Representative berseem crop photograph, not a photograph of the offered planting seed lot.

Berseem (*Trifolium alexandrinum*) is listed as planting seed for establishing a fodder crop. Specify the variety, intended growing region and lot-specific seed quality requirements.

COMMON APPLICATIONS

Fodder crop establishment; agricultural planting-seed supply.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Variety & identity	Required variety and intended growing region
Germination (%)	Minimum target and required test date
Physical purity (%)	Minimum pure seed; limits for inert matter and other seeds
Moisture (%)	Maximum acceptable moisture
Other seeds	Required limits for weed seeds and other crop seeds
Treatment & documentation	Required treatment status, lot reports and seed documents

Planting seed only, not seed for direct human consumption or feeding. The product photo shows the berseem crop, not a seed lot.

Red kidney beans

GRAINS & PULSES | Dried whole beans

Representative photograph; not the offered lot.

Red kidney beans are dried whole pulses for trading and food processing. Agree light or dark red type, size and physical quality using a specification or sample reference.

COMMON APPLICATIONS

Pulse distribution; food processing; food service.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Type & size	Light or dark red; size or count and measurement basis
Moisture (%)	Maximum acceptable moisture
Defects & admixture	Limits for split, damaged and discoloured beans; foreign matter
Processing quality	Any cooking or processing test required

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

SEND YOUR SUPPLIER OFFER

Full specification guide online

Cashew kernels

NUTS | Shelled kernels

Cashew kernels are shelled cashew nuts for food ingredient and distribution enquiries. Specify whole kernels or pieces, the grade or count designation, colour and packing.

COMMON APPLICATIONS

Food ingredients; snack processing; food distribution.

Representative photograph; not the offered lot.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Grade & count	Whole or pieces; required grade and count basis
Moisture (%)	Maximum acceptable moisture
Colour & defects	Colour reference and limits for damaged kernels
Food-quality testing	Required microbiological, contaminant and condition checks
Packing	Bulk or retail requirement; inner pack and net weight

Cashew is a tree-nut product. Allergen handling and labelling requirements should be stated with the enquiry.

Saffron

WHOLE SPICES | Dried threads

Representative photograph; not the offered lot.

Saffron is listed as dried threads for spice and food ingredient sourcing. Confirm origin, grade, authenticity evidence and any required laboratory test basis rather than relying on colour or a trade name alone.

COMMON APPLICATIONS

Spice distribution; food ingredients; food service.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Form & origin	Dried threads; declared origin and grade
Authenticity & identity	Required authenticity evidence and sampling arrangements
Colour, aroma & flavour	Required colour strength, aroma and flavour tests; agreed method
Moisture (%)	Maximum acceptable moisture
Foreign matter & packing	Limits for unwanted material; pack type and net weight

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

Full specification guide online

Sesame seeds

SEEDS | Natural or hulled seeds

Representative photograph; not the offered lot.

Sesame seeds are sourced in natural or hulled form for food ingredients and processing. Specify colour, origin, purity and intended application.

COMMON APPLICATIONS

Food processing; ingredient supply; sesame distribution.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Form & colour	Natural or hulled; required colour
Purity (%)	Minimum purity and permitted foreign matter
Moisture (%)	Maximum acceptable moisture
Food-quality testing	Required microbiological and contaminant analysis
Oil content	Target and test method, if relevant

Confirm origin, crop year, quantity, packing, lot testing and required documents with the quotation.

Maize - cattle feed

GRAINS & PULSES | Cattle-feed grain

Dried maize is sourced for cattle-feed milling and feed processing. Suppliers should share origin, crop year, moisture, broken-grain and foreign-matter limits, and required feed-quality analysis.

COMMON APPLICATIONS

Cattle feed; cattle-feed milling and compound-feed processing.

Representative maize photograph; not the offered feed-grain lot.
Feed quality and variety are confirmed with the quotation.

Specification guide

Enquiry parameters - target values and lot results are agreed with the offer.

PARAMETER	WHAT TO AGREE
Intended use	Cattle feed
Grain type & appearance	Required colour or type and sample reference
Moisture (%)	Maximum acceptable moisture
Broken kernels & foreign matter	Maximum acceptable broken grain and foreign-material limits
Damaged kernels	Required limits for damaged, heat-damaged or discoloured kernels
Test weight	Target value, unit and method if required
Feed-quality analysis	Any required protein, fibre or other feed-related analysis
Mycotoxins & testing	Required aflatoxin, other mycotoxin and relevant contaminant tests
GMO-status declaration	Required status and supporting evidence, if applicable

Import sourcing for cattle-feed grain only. Origin, feed-quality evidence, destination acceptance and shipment eligibility are confirmed for the proposed lot.
