

Alfalfa seeds

PRODUCT & SPECIFICATION GUIDE

Medicago sativa

Planting-seed enquiries for establishing a fodder crop. Confirm the variety and intended growing region.

Representative photograph.
Not the offered lot.

LISTED QUALITY OPTIONS

Single-year quality; Multi-year quality

Intended use	Fodder planting; not a food or sprouting-seed offer
Variety and crop year	Identity, harvest year and growing-region suitability confirmed
Germination and hard seeds	Lot test results, test date and acceptance limits agreed
Physical purity and moisture	Lot results and limits for other seeds / inert matter agreed
Treatment and documentation	Treatment declaration, tests and destination certificates confirmed
Packing and quantity	Bag size, net quantity, labels and shipment terms agreed

Single-year and multi-year are listed commercial options. Confirm variety and lot tests separately. Detailed limits and availability are agreed with each quotation.
